### **Abstract**

© 2015 Canadian Center of Science and Education. All rights reserved. Reproduction processes in the Republic of Tatarstan which is perceived as one of the most dynamically developing regions of Russia are analyzed in this article on the basis of statistical data. The comparative strategy is used in the research, such as the following: the data of the modern demographic situation is compared to the data of the demographic situation at the beginning of XXI century. The final aim is to find out for the tendencies of the development of regional community, their specifics, degree of correlation with Russian demographic development.
